Konstantinos Smanis

Software Engineer

Patras, Greece • cv@ksmanis.mozmail.com • ksmanis.github.io • KSmanis • ksmanis

Experience

Senior Software Engineer **Jun 2022 – present**
EXUS *Remote*

Worked on several high-impact software products while mentoring a small team of backend engineers.

- Built from scratch a FastAPI backend on Kubernetes using PostgreSQL, Redis, and Kafka.
- Built from scratch a multi-cloud serverless Flask backend on the AWS and Azure clouds.
- Implemented and maintained an extensive test suite (>90% coverage) using pytest.

Software Engineer **Sep 2020 – Jun 2022**
EXUS *Remote*

Worked on the development and productization of software prototypes as well as several EU-funded projects.

- Developed live-streaming dashboards using Dash, Kafka, and PostgreSQL.
- Set up and managed a Jenkins instance using end-to-end Dockerized pipelines.
- Managed internal servers and automated internal processes using Ansible and shell scripting.

Postgraduate Design Engineer **Jan 2019 – Oct 2019**
Thermo Fisher Scientific *Eindhoven, The Netherlands*

Worked independently on the software design and implementation of the "Intelligent Microscope II" research project.

- Developed a web application with chatbot capabilities using Django, Django REST framework, JavaScript, and AWS.
- Trained deep learning models using TensorFlow, deployed them on the Amazon cloud, and incorporated them into the web application using OpenCV and TensorFlow Serving.
- Containerized the web application using Docker.

Postgraduate Design Engineer **Oct 2017 – Dec 2018**
Eindhoven University of Technology *Eindhoven, The Netherlands*

Worked on a variety of software projects for leading industrial partners.

- Experimented with a broad range of software paradigms from areas such as web applications, embedded systems, and data science.
- Assumed different team roles in order to get acquainted with various aspects of the software development process.
- Collaborated in teams of varying sizes employing Agile methodologies.

Network & Systems Engineer **Sep 2016 – Nov 2016**
Hellenic Army *Athens, Greece*

Fulfilled my military service obligation as a Research & Informatics Corps private at the Hellenic Army IT Support Center (KEPYES).

- Administration and maintenance of the Hellenic Army General Staff network infrastructure.
- Configuration of Windows Server (Active Directory).
- Technical support for end users.

Education

Engineering Doctorate (EngD) in Software Technology **Oct 2017 – Oct 2019**
Eindhoven University of Technology *Grade: 4/5*

Master of Engineering (MEng) in Electrical & Computer Engineering **Sep 2010 – Apr 2016**
University of Patras *Grade: 7.81/10*

Languages

Greek (native), English (proficient: C2), German (advanced: C1)
